EDUCATION

Institut Teknologi Bandung , Bandung <i>Bachelor of Engineering, Chemical Engineering</i>	Aug 2023 — Present
SMAN 8 Bandung , Bandung <i>Senior High School</i>	Jul 2020 — May 2023

ORGANIZATIONAL EXPERIENCE

PT Gapura Liqua Solutions , Bandung <i>Process Engineering Intern</i>	Jan — Feb 2026
- Conducted a technical and economic study on centralized Mechanical Vapor Recompression (MVR) systems for industrial salt production from brine. - Analyzed the existing two-unit MVR configuration and proposed a centralized MVR concept to improve thermal efficiency, process stability, maintenance simplicity, and product quality. - Evaluated key performance indicators including specific energy consumption, Grade A product ratio, maintenance cost, CAPEX, annual benefit, payback period, NPV, and IRR. - Mapped the industrial salt production process from brine pretreatment, evaporation, MVR, crystallization, centrifugation, drying, and final product grading - Prepared a technical report and final presentation outlining assumptions, process limitations, technical risks, and further validation needs for implementation.	

ORGANIZATIONAL EXPERIENCE

KATALIS HIMATEK-ITB 2025 , Bandung <i>Staff of Mentor Development Division</i>	Aug — Oct 2025
- Developed comprehensive mentor training modules for 20+ prospective mentors, covering leadership development, effective communication, and cadet assessment techniques. - Facilitated bi-weekly mentoring sessions, enhancing mentor competency and confidence in guiding 100+ new cadets. - Designed and implemented mentor performance evaluation system, tracking progress through structured feedback.	
Himpunan Mahasiswa Teknik Kimia ITB (HIMATEK-ITB) , Bandung <i>Head of Internal Department</i>	May 2026 — Present
- Directed internal department operations across 4 divisions to foster organizational culture, academic support, student welfare, and extracurricular engagement for 300+ HIMATEK-ITB members. - Coordinated internal work plans, timelines, and task distribution across division members to ensure effective program execution. - Managed cross-functional collaboration with other departments to support internal events, member development activities, and organizational initiatives. - Supervised staff performance through regular coordination, feedback, and progress monitoring to maintain team productivity. - Developed internal strategies to improve member participation, team bonding, and operational consistency within the organization.	
ChENight 2025 , Bandung <i>Head of Event Department</i>	Jan — May 2025
- Led a cross-functional team of 20+ event staff across pre-event and main event divisions, overseeing end-to-end event planning and execution for 350+ participants from 3 engineering departments. - Designed and coordinated pre-event team-building games, increasing inter-department engagement	

by 60% and building momentum for main event attendance.

- Managed stakeholder relationships with 3 department heads, 50+ student performers, and faculty members, securing participation and ensuring seamless collaboration across departments.
- Developed event timeline and contingency protocols, ensuring 100% on-time execution and maintaining positive participant feedback throughout the event series.

Atma Asta 2022: Valhera, Bandung

Feb — Nov 2022

General Manager of Production

- Directed 4 production divisions (Events, Logistics, Visual Documentation, Consumption) comprising 100+ staff members, orchestrating seamless execution of large-scale music concert for 7,000+ attendees.
- Managed end-to-end production operations including stage setup, artist coordination, crowd control, and safety protocols for 7 national headliner artists and audition band performers.
- Oversaw logistics planning and resource allocation, coordinating vendor contracts, equipment procurement, and F&B services to ensure operational efficiency and cost control.
- Led cross-functional collaboration between production teams, security, and venue management, achieving zero safety incidents.
- Developed contingency protocols and real-time problem-solving frameworks, enabling rapid response to operational challenges and ensuring successful event delivery with positive stakeholder feedback.

LANGUAGES AND SKILLS

Technical Skills

- Bahasa Indonesia (Native), English (Professional Working Proficiency).
- Software & Tools: Aspen HYSYS, MATLAB, Microsoft Office, Google Suite.
- Process Engineering Core (Mass & Energy Balance, Unit Operation, PFD & P&ID, Process Simulation).
- Laboratory & Analytical: Quality Control Testing (Titration, Viscosity, pH, Composition Analysis, Data Analysis).
- Technical Report Writing
- Process Optimization
- Techno-Economic Analysis

Transferable Skills

Project & Operations Management:

- Cross-functional Team Leadership
- Event Production & Logistics Coordination
- Resource Allocation & Budget Management
- Vendor & Stakeholder Management
- Process Standardization & SOP Development
- Risk Management & Contingency Planning

Project & Operations Management:

- Problem Solving & Analytical Thinking
- Communication & Presentation Skills
- Mentoring & Training Development
- Team Collaboration & Interpersonal Skills
- Time Management & Multitasking
