Profile

Food Technology graduate from Universitas Gadjah Mada with experience in thermal process validation and food product development. Skilled in Fo value analysis and sterilization process evaluation to support product safety and quality. Interested in process improvement and operational efficiency in food manufacturing.

Skills : Communication, Teamwork, Critical Thinking, Public Speaking, Team Leadership, Microsoft Office, SPSS

Expertise : Thermal Process Validation, Process Control and Optimization, Production Process Analysis

Education

Universitas Gadjah Mada

Aug 2021 - Aug 2025

Bachelor of Food and Agricultural Product Technology, 3.48/4.00

Work Experiences

Food Safety and Process Analyst - Universitas Gadjah Mada

Aug 2025 - Apr 2026

- Validated retort sterilization using Fo value and heat penetration analysis through systematic evaluation, ensuring commercial sterility, 30+ products across 8 partners.
- Conducted thermal validation using retort process protocols in collaboration with multiple industry partners
- Developed Detailed Engineering Design (DED) for sterilized milk processing in collaboration with regional government stakeholders (Dinas Koperasi Daerah Istimewa Yogyakarta), supporting small-to-medium dairy industry development

Laboratory Teaching Assistant - Product and Process Development Course

Jan 2025 - Jun 2025

- Guided 10 student teams in developing food products by supervising formulation, production workflow, and sterile processing practices
- Evaluated product formulations and production outcomes, providing technical recommendations to improve product quality and shelf stability.

Internship Experiences

PT Hardjo Andrawina Nusantara - Yogyakarta

Sep 2024 - Dec 2024

- Developed factory production layout and CPPOB documentation to support proper food manufacturing practices.
- Analyzed packaging defect data during sterilization, identifying factors affecting pouch damage and contributing to process improvements that increased production capacity from 100–150 to ~300 pcs per batch

PT Great Giant Pineapple - Lampung, Indonesia

Jan 2024 - Feb 2024

- Analyzed production efficiency under the Productivity & Improvement team by evaluating factors affecting detinning defects in canned pineapple products
- Identified root causes of detinning in the seamer area and compiled findings into a technical report to support defect reduction and improved production effectiveness

Leadership Experiences

BEM FTP UGM - Head of Public Relation Content

Nov 2021 - Dec 2023

- Managed end-to-end digital content workflows using strategic planning and collaborative leadership to oversee all BEM FTP social media outputs.
- Leading a podcast initiative that generated 1,500+ views across 4 produced episodes.

KMTPHP UGM - Human Resources Staff

Feb 2022 - Jan 2023

- Monitored member performance and engagement, contributing to improved task completion rates and structured internal coordination.
