Linkedin: <https://www.linkedin.com/in/rafi-dwi-prasetyo-4247a8387/>

Quality-driven professional with a Bachelor’s Degree in Biology and hands-on experience in production and quality control within footwear manufacturing. Skilled in monitoring production processes, conducting inline inspections, and ensuring compliance with quality standards to prevent defects. Experienced in leading production lines, coordinating cross-functional teams, and driving continuous improvement initiatives. Certified in HACCP, FSSC 22000, GMP, and ISO 22000:2018, with strong understanding of quality systems (SAP), safety (K3), and operational excellence.

Education

Universitas Sebelas Maret – B.Sc. in Biology August 2021 – July 2025

- GPA 3,68/4,00
- Thesis: “Stimulant Effect of Ethanol Extracts of *Centella asiatica* (L.) Urb and *Tinospora asiatica* (L.) Stems on Male Mice
- Relevant Coursework: Microbiology, Enzyme Biotechnology, Industrial Microbiology, Laboratory Technique, Biochemistry, Animal Cell Culture.

Professional & Work Experience

Product Development Specialist March 2026 – Present

PT Tah Sung Hung

- Monitored and ensured product development and sample production processes complied with established quality standards and technical specifications.
- Conducted inline quality control from incoming materials to finished goods, supporting accurate product release and preventing defects.
- Identified, analyzed, and documented quality issues during development, implementing preventive actions to minimize risks in mass production.
- Coordinated with cross-functional teams (Purchasing, Quality, Development) to verify material specifications and ensure alignment with product and development requirements.
- Supported continuous improvement initiatives by enhancing development workflows, quality checks, and communication efficiency.

Management Trainee December 2025 – March 2026

PT Tah Sung Hung

- Completed cross-functional rotations across Development, Production, Quality, Warehouse, and Purchasing, gaining strong understanding of end-to-end manufacturing.
- Supervised a production line during training, ensuring adherence to quality standards, production targets, and timely PO completion.
- Applied quality control systems including incoming material inspection (SAP-based) and final product evaluation prior to shipment/release.
- Supported QC decision-making processes by assisting in product evaluation and ensuring compliance with specifications before release.
- Implemented basic GMP, 5R, and workplace safety (K3) practices within production and quality areas.
- Contributed to continuous improvement projects focused on reducing defects, improving process efficiency, and strengthening quality control systems.

General Biology Laboratory Assistant Coordinator August – December 2024

Sebelas Maret University

- Led a team of 10 general biology laboratory assistants.
- Designed and organized practicum sessions for the semester
- Supervised the implementations of aseptic techniques and laboratory safety
- Processed and finalized student grades prior to submission to lecturers.

Laboratory Intern at Laboratorium January – February 2024

Surakarta Animal Health Laboratory

- Performed microbiological analyses (floating and sedimentation tests) on 30+ animal fecal samples from Solo Safari Zoo
- Conducted Hemmagglutination Inhibition (HI) assay on animal blood samples form farms in Boyolali, Central Java, to evaluate vaccination effieciency
- Assisted in molecular biology analysis through Polymerase Chain Reaction (PCR) testing
- Conducted microbiological sampling (fungi and bacteria) from animal pens and soil to evaluate microbial diversity and hygiene quality of the pens

General Biology Laboratory Assistant

August – December 2023

Sebelas Maret University

- Guided 90+ first semester biology student in completing final mini projects (e.g., simple DNA extraction, yoghurt modificcation from chili).
- Supervised students in operating laboratory equipment such as digital microscopes, biosafety cabinet (BSC), laminar air flow (LAF), centrifuge, and autoclave
- Introduced student to basic microbiology technic such as TPC, spread plate, pour plate for bactery and fungi.
- Introduced students to basic bioinformatics tools, including BLAST
- Analyzed water quality from a microbiological perspective using campus lake water samples.

Certification

- Good Manufacturing Practices (GMP) – Makin Ahli | Juli, 2025
- FSSC 22000 – Makin Ahli | Juli, 2025
- Hazard Analysis and Critical Control Point) HACCP – Makin Ahli | Juli, 2025
- ISO 22000:2018 – Makin Ahli | Juli, 2025

Organization

Himpunan Mahasiswa Biologi (HIMABIO)

March – December 2023

Staff, Student Development Department

- Organized and executed orientation programs for new members and freshmen.
- Designed event rundown, theme, and activities for EMBRIO (Biology Freshmen Education Program).

Event Chairman – PROBIO (Annual Sports Event)

- Directed a 30-member committee to deliver a department-wide sports festival.
- Oversaw planning, inter-division coordination, reporting, and accountability.

Secretary, Student Development Department

- Managed meeting minutes, documentation, and administrative tasks.
- Assisted the department head in program planning and execution.

Skills

Technical Skills

- **Extraction Techniques:** Natural product sampling, ethanol extraction, yield calculation (Pharmacopoeia), rotary evaporator, water bath.
- **Microbiology:** Swab sampling, bacterial & fungal culture, BSC/LAF operation, Gram staining.
- **Manufactur:** SAP PP, SAP QM, SAP WM.
- **Software:** MS Office (Word, Excel, PowerPoint), SPSS.

Languages

- Bahasa (native),
- English (Toefl Score: 577)
