As a graduate of Robotics and Artificial Intelligence Engineering from Universitas Airlangga, I have a strong foundation in IoT technologies, automation systems, and embedded devices. Through various academic and project experiences, I became familiar with interpreting technical requirements and turning them into functional solutions, such as sensor integration, microcontroller programming, and real-time data processing with dashboards for monitoring. I enjoy solving practical challenges, working with others to improve designs, and exploring ways to make systems more efficient and reliable.

Education Level

Universitas Airlangga - Surabaya, Indonesia

Sep 2021 - Jul 2025

Bachelor of Robotics and Artificial Intelligence Engineering, 3.52/4.00

Work Experiences

PT Angkasa Pura Indonesia

Nov 2025 - May 2026

Airport Equipment Intern

- Manage planning, standardization, and quality assurance of airport electrical and mechanical equipment.
- Ensure readiness of facilities and equipment to support airport operations and services.
- Ensure compliance with applicable aviation regulations and standards at branch office level.

PT INKA (Persero)

Oct 2024 - Dec 2024

IoT Engineer Intern

- Developed and implemented an electrical monitoring system for non-IoT industrial machines using PLC
- Configured data communication and built a reliable pipeline to transmit electrical parameters from the PLC to the server
- Designed a Grafana-based dashboard and ensured system accuracy through testing and calibration

PT Pesona Inti Rasa

Jul 2024 - Aug 2024

Automation and Maintenance Engineer Intern

- Supported senior engineers in project planning and execution
- Documented system configurations and provided technical support for troubleshooting issues
- Performed system testing and debugging to ensure reliable operation of automated systems

Organisational Experience

Himpunan Mahasiswa Teknik Robotika dan Kecerdasan Buatan

Mar 2023 - Feb 2024

Head of Cadre Division

- Responsible for the development and coaching of cadres in the organization. Involves several aspects, namely cadre planning, training and coaching, and monitoring
- Lead and manage a cadre division, including staff responsible for training and development
- Provide leadership, mentorship, and support to team members, fostering a positive and productive work environment. With 10+ events to foster stronger relationship among students

ROTATION (Robotics & AI Freshman Preparation)

Jul 2022 - Sep 2023

Chief Division of Technical

- Responsible for the management and coordination of activities occurring in the field.
- Communicate technical information effectively to non-technical stakeholders.

ROBOSHIP (Robotic Internship)

Aug 2023 - Nov 2023

Project Leader

- Coordinate with other members of HIMATERA to ensure all aspects of the program are well-organized and executed smoothly.
- Lead and manage a team of volunteers to assist in organizing and executing the ROBOSHIP program.
- Mentor new students and team members, helping them develop their skills and confidence within HIMATERA.

Skills, Achievements & Other Experience

- Achievements** (2023): Kontes Robot Terbang Indonesia Fixed Wing Regional Competition Participant
- Language:** Indonesian and English
- Software:** Autodesk Inventor, Proteus, Cx Programmer, Arduino IDE, Office
- Programmer Language:** Python, C++, C, SQL
